

Rock My World

**They had watched our planet
From a long, long way.
Across time, another world
Another galaxy where they lived
About a billion years ago.**

**They decided to contact the beings
That lived upon the Earth, they sent out
Videos and other types of noise
Wondering what they would find
So very far from home.**

Ooh, rock my world. Ooh, rock my world.

**People heard the noise
They raised up their eyes
Towards the sky as if
They could see back into time
Long ago, so long ago
To when the signal was first sent**

Ooh, rock my world. Ooh, rock my world. Ooh, rock my world.

**All the laypeople they tried to guess what it could mean
When the scientists using special tools
Decoded all that noise from outer space
I guess you know what they heard**

**Ooh, rock my world. Ooh, rock my world.
Ooh, rock my world. Ooh, rock my world.**
